

DeepImageSearch_v1.43

September 16, 2024

0.0.1 Notebook author: Solomon Sonya 0xSolomonSonya

Python Version Executing this notebook: Python 3.11 (Anaconda 2024.02)

1 Malware Classification using DeepImageSearch

The purpose of this notebook is to introduce the methodology of using Convolutional Neural Networks (CNN) for malware classification. This notebook selects a few CNNs loaded in DeepImageSearch to analyze malware and assess performance of each CNN.

#####
# DeepImageSearch
#####
Name: DeepImageSearch
Version: 2.5
Summary: DeepImageSearch is a Python library for fast and accurate image search.
It offers seamless integration with Python, GPU support, and advanced
capabilities for identifying complex image patterns using the Vision Transformer
models.
Home-page: https://github.com/TechyNilesh/DeepImageSearch
Author: Nilesh Verma
```
